

Amendments

In the Specification:

Please cancel the existing Sequence Listing for the above-identified application, replace it with the substitute Sequence Listing appended hereto, and insert the same at the end of the application.

Please replace pending page 78 of the specification with the attached page 78 of the specification.

Remarks

Applicants' Agent hereby states that the changes made in the sequence listing do not include new matter. In compliance with 37 C.F.R. § 1.825(a), Applicants submit substitute sheets to amend the paper copy of the Sequence Listing. Applicants have added the two sequences (SEQ ID NOs:56 and 57) from Table 3 ("DR7 preferred" and "DR7 deleterious," respectively) that contain four or more defined amino acid residues. None of the remaining sequences in Table 3 contain four or more defined amino acid residues. Support for this amendment is found, inter alia, in Table 3. Applicants' undersigned attorney has amended the specification to direct the entry of this substitute Sequence Listing at the end of the application.

In accordance with 37 C.F.R. § 1.825(b), the paper copy of the Sequence Listing and the computer readable copy of the Sequence Listing submitted herewith are the same.

Page 78 of the specification has been amended to insert sequence identifiers for SEQ ID NOs:56 and 57 into Table 3.
